PAPER TITLE

AUTHOR 1 AND AUTHOR 2

Abstract. Abstract is required and should summarize, in less than 250 words, the context, content and conclusions of the paper. It should not contain, any references or displayed equations.

1. Introduction

All the manuscripts are subject to a review process before publication. All contributions will be initially assessed by the editors for suitability of the journal. Papers which are suitable are then typically sent to two independent expert reviewers to assess the scientific quality of the paper. Each reviewer fills in independently the review form and submits it to the editors. After the final edition and approval by the editors, the manuscript will be accepted for publication. The editors reserve the right to make editorial changes. The final decision for publication is made by the editors.

2. Preparing the manuscript

The manuscript written in English is submitted to the Editorial office of the journal.

Submission of a manuscript: Manuscripts should be submitted exclusively by online submission system of the journal. The online submission system guides the authors step-wise through the process of entering manuscript details and uploading manuscript files. All correspondence, including notification of the editors decision and requests for revision, is sent by e-mail.

Responsibility of the author/s: Submission of a manuscript implies that the material presented in the paper has not been published before, except in the form of an abstract, part of a lecture or thesis; it is not under consideration for publication anywhere; it has been approved by all co-authors if any. A publication has been approved as well as by the responsible authorities of the institution where the work has been carried out. The publisher will not hold any legally responsible in case of claims for compensation and reimbursement of authors rights.

Citations: For citation in the text, you use brackets and consecutive numbers: [1], [2], [3], ...

2.1. **Table.** Every table must have a caption.

TABLE 1. *Title of the table*

1	2	3
4	5	6

2.2. **Proposition, Theorem, Lemma, Proof.** Indicators: Proposition, Theorem, Lemma, Proof ...

Theorem 2.1. *The text of the theorem ...*

Proof. The proof of the theorem ....   □

Proposition 2.1. *The text of the proposition ...*

Proof. The proof of the proposition ....   □

Lemma 2.1. *The text of the lemma ...*

*Proof.* The proof of the lemma ....

□

2.3. **Formulas.** The formulas:

$$L = \sum_{n=0}^{\infty} a_n \frac{t^n}{n!} \tag{2.1}$$

$$\dot{x} = \sigma(y - x) \tag{2.2}$$

Text ....

2.4. **Figures.** Figures include graphics, photography drawing, charts, pies, histograms etc. The images should be in eps format.

FIGURE 1. *Title of the figure*

2.5. **Algorithm.** The algorithms should be written in the following form:

Algorithm 1 How to write algorithms

Input: this text
Output: how to write algorithm with LaTeX2e

initialization;
while not at end of this document **do**
 read current;
 if understand **then**
 go to next section;
 current section becomes this one;
 else
 go back to the beginning of current section;
 end
end

---

3. Results and discussion

The headers **Materials and methods** and **Results and discussion** are compulsorily for natural, technical, biotechnical and medical sciences, in the papers where is done empiric research or is performed an appropriate experiment. These headers are not compulsorily for social and human sciences, and art, as well as for review of papers in all areas and they are replaced by appropriate thematic chapters.
